## DETAILED ACTION

Claims 1-7 has been cancelled, and claim 8 is pending in the instant application. Therefore, claim 8 will be examined on the merits.

### ***Response to Amendment***

The Amendment by Applicants' representative Kevin S. Lemack dated on 06/18/2007 has been entered.

### ***Response to Arguments***

#### **Argument over rejection of claim 8 under 35 U.S.C. §102(b)**

Applicant's argument over rejection of claim 8 *under 35 U.S.C. §102(b)* has been fully considered, and found persuasive. Therefore, the rejection over rejection of claim 8 *under 35 U.S.C. §102(b)* has been withdrawn.

#### **Argument over rejection of claims under 35 U.S.C. §103(a)**

Applicant's argument over rejection of claim 8 *under 35 U.S.C. §103(a)* has been fully considered, but found not persuasive. Applicant's argument is on the ground that there is no suggesting leading to the instant compound as claimed, nor is there any suggestion that any advantageous effect can be obtained by combining the specific diimmonium compounds claimed with the specific counter ion claimed.

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the

Art Unit: 1626

references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). The cited reference by Santo disclosed the claimed compound as indicated with the specific examples on pages 4-5 of the previous Office action having anions X<sup>-</sup>. The anion of CF<sub>3</sub>SO<sub>3</sub><sup>-</sup> is suggested by Sugimachi as an anion used for a near infrared ray absorbing agent with limited number of choices (around 20 anions). On the other hand, the unexpected results Applicants cited by Applicants as Comparative Example 3 and 4 are not the direct comparison of the cited prior art compounds II-(4) and II-(15) in the Office action. Finally, the comparision data in Table 8 among Examples 8, 10, and comparative 3 and 4 are at range of 5.5-6.5 versus 9.0-14.3 is not significantly unexpected results because there is no deviation was provided in the original disclosure. Therefore, the rejection of claim 8 under 35 U.S.C. §103(a) is maintained.

### **Conclusion**

- Claim 8 is rejected.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 1626

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
